

Java

```
class Solution {  
    public boolean makeEqual(String[] words) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string[]} words  
 * @return {boolean}  
 */  
var makeEqual = function(words) {  
  
};
```

C++

```
class Solution {  
public:  
    bool makeEqual(vector<string>& words) {  
  
    }  
};
```

C#

```
public class Solution {  
    public bool MakeEqual(string[] words) {  
  
    }  
}
```
